NORTH EAST TRANSPORT BEHAVIOUR AND ATTITUDE SURVEYS

Positivity towards ways of travelling

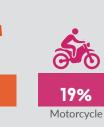

Wave 3 Report (Survey Undertaken between Tuesday 1st September and Tuesday 8th September 2020) Key Findings Infographic

More walked to drop off their child to school in the last seven days than before travel

Reasons for feeling negatively towards public transport

distancing may not be in place

coronavirus/other illness

easier/more convenient

How to feel safer

sanitiser at stations/stops

of face covering

Since the Covid-19 restrictions

49%

Walking more now for leisure/exercise

30% Walking more now to replace journey 30%

Cycling more now for leisure/exercise

16% Cycling more now to replace journey normally made another way

Commuting behaviours

have made a trip to work in the last seven days

would like to work more flexibly

expect that virtual meetings will replace some, or all, face to face meeting

Results for Wave 3 are broadly similar to Wave 1 & 2 Key differences include:

- Fewer reported feeling negatively towards travelling by train and taxi
- A continued increase in those who expect that virtual meetings will replace some, or all, face to face meetings
