

Public transport users were around **twice more likely** than non-users to **feel positively** towards using the bus and train

NORTH EAST TRANSPORT BEHAVIOUR AND ATTITUDE SURVEYS

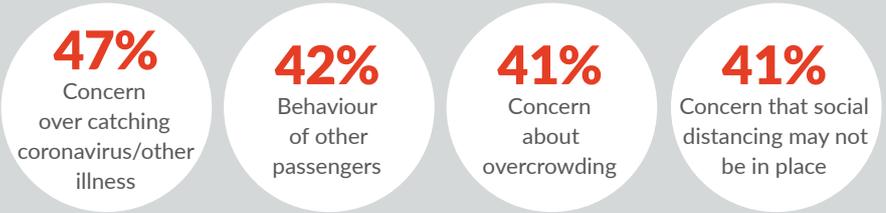

7/10 agree that the use of face coverings on public transport makes them feel safer

Wave 15 Report
(Survey undertaken between 10th January and 25th January 2022)
Key Findings Infographic

Positivity towards ways of travelling

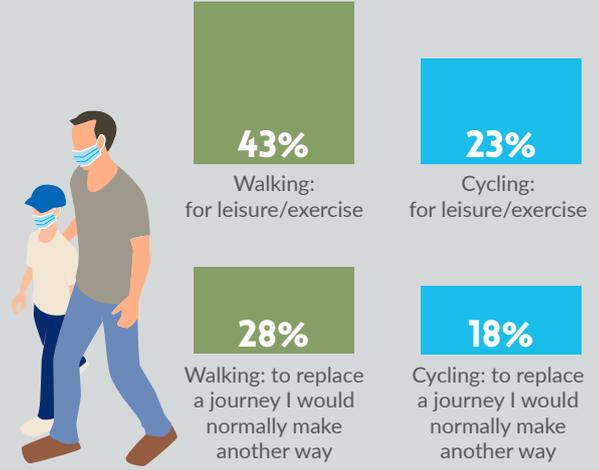

Reasons for feeling negatively towards public transport

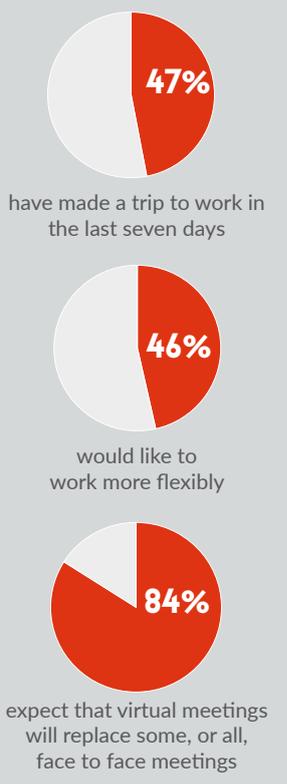

How to feel safer

Since the Covid-19 restrictions

Commuting behaviours

The results for Wave 15 are broadly similar to Waves 14. Key differences include:

- Fewer people are travelling into work
- Fewer would like to work more flexibly going forward*
- More people anticipate a decrease in their commuting journeys once all restrictions are lifted
- More people said that they already feel safe whilst using public transport and that nothing will make them feel safer whilst using public transport

* This finding could suggest that they are working as flexibly as they want to now, or potentially could be due to a larger proportion of the sample working part-time compared to full-time, in comparison to previous waves
